## AS EV ADOPTION RAMPS UP

**Gain New Happy Customers.  
Keep Existing Customers Happy.**

EV sales are on pace to break one million in the US this year.<sup>1</sup>

Experts predict that 26.4 million electric vehicles will be on U.S. roads in 2030.<sup>2</sup>

Tesla's Model Y was America's best-selling passenger car in the 1st Quarter of 2023.<sup>3</sup>

HiION Charge locations average 46 to 50 charging sessions per week.

The estimated revenue opportunity is approximately \$1 per minute of charge time.

## Easy, Affordable, Reliable Fast Charging Solutions for Parking Operators

HiION provides a low-to-no cost, hassle-free pathway to EV charging station implementation for US parking operators. You provide the space, we do the rest.

As the United States transitions to electric vehicles, parking lot operators are expected to shoulder the expense and headache of managing EV charging stations at every parking spot. And while there is a lot of funding available right now for installing and commissioning the initial equipment, the long-term costs of maintenance, repair and general management fall on the shoulders of the operators.

Would you rather employ parking lot attendants who are also experts at maintaining and repairing charging station equipment? Or would you rather partner with HiION and leave the cost and expense of managing the equipment to someone else?

### HiION Provides

- Site evaluation and charging station implementation.
- Rebate and incentive management.
- Electrical system upgrades.
- Permits, construction & commissioning.
- Ongoing station maintenance, repairs and technology updates.

## Soon, Just About Every Parking Spot Will be Equipped with an EV Charger. Will Your Parking Lot Be Ready?

As the Transition to EV Continues, More Drivers Will Select Parking Based on Charging Availability.

- By preparing for this reality now, your facility will be a ready, known source for EV charging.
- HiION maintains its equipment regularly and quickly responds to repair calls to ensure you remain a trusted source for reliable charging opportunities.
- We take care of equipment upgrades, so you don't have to worry about future expenses that will inevitably come up after all the government incentives have been spent.

## Taking Care of Your Patients Starts the Moment They Arrive...Parking Lot EV Chargers are a Demonstration of that Commitment!

*Partnering with HiION is a low-cost way for you to provide your community with equitable access to EV charging.*
